RE: FOIA 19-11

Dear Sirs/Madams:

This letter responds to your Freedom of Information Act request for a copy of the SF311 submitted to NARA from DISA for all available years.

There were twelve pages responsive your request. Portions of those pages have been redacted pursuant to 5 U.S.C. §552 b(6).

Due to the national emergency declared by the President in the aftermath of the terrorist attacks of September 11, 2001, the Department of Defense (DoD) has reviewed its policy regarding the release of names and identifying information of personnel not assigned to units protected from release by statute (10 USC § 130b). As a result of this review, it has been determined that release of lists of names of personnel would constitute a clearly unwarranted invasion of the personal privacy of those individuals. Accordingly, the information you requested is exempt from release pursuant to 5 USC § 552 b(6).

If you are not satisfied with this response, you have the right to appeal to the General Counsel, Defense Information Systems Agency, P.O. Box 549, Ft. Meade, MD 20755 or by facsimile at 301-225-0511. Your appeal must be postmarked or electronically transmitted within 90 days of the date of this response. Both the letter and the envelope as well as your electronic transmission, should be clearly marked "Freedom of Information Act Appeal."

For any further assistance and to discuss any aspect of your request, you have the right to contact the Defense Information Systems Agency FOIA Public Liaison at 301-225-6109. Additionally, you have the right to contact the Office of Government Information Services (OGIS) to inquire about the FOIA mediation services they offer. The contact information for OGIS is: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

This concludes the initial determination by this agency. If we can be of further assistance, please do not hesitate to contact Robin M. Berger, FOIA Manager at (301) 225-6104.

PART I: Explanatory Comments

Use this space to elaborate on any section of this form. If more space is needed, provide as an attachment to this form. Provide explanations for any significant changes in trends numbers from the previous year's report.

Sampling: The entire DISA workforce is cleared at least at the Secret level, therefore, eligible to make derivative classification decisions. DISA has approximately 15,105 employees which includes military, civilians and contractors.

The time period for data collection was 1-14 September 2015. A survey for data collection was established and provided to each DISA activity security manager with the task of ensuring all personnel that carry out derivative classification decisions received the action to collect data during the sampling period. Results were reported to the DISA Security Office at the completion of the sampling period. The responses were added and the totals were multiplied by 26 to provide a representation of derivative classification decisions made during FY15.

Analysis: The total number of derivative classification decisions made by the Agency did not change a great deal from FY14 (72,384). The results did show a rise in Top Secret classification decisions from 468 in FY14 to 2,340 in FY15. The number of Secret classification decisions decreased slightly from 65,650 in FY14 to 55,016 in FY15. The number of Confidential classification decisions decreased from 6,266 in FY14 to 3,432 in FY15.

The guidance for collecting data for FY15 was more detailed to allow the derivative classified to better understand the type of information and sources to be included in the data they collected. This may be the cause of the change in numbers reported for Top Secret information. There is also the potential that there was an increase in work completed at the Top Secret and Confidential levels during this reporting period.

PART J: Explanatory Comments

Use this space to elaborate on any section of this form. If more space is needed, provide as an attachment to this form. Provide explanations for any significant changes in trends/numbers from the previous year's report.

Sampling: The sampling period was 11-24 September 2016. The survey for data collection was provided to each activity with the task of ensuring all personnel that carry out derivative classification decisions received the action to collect data during the sampling period. The Joint Forces Headquarters-Department of Defense Information Networks (JFHQ-DODIN) was also tasked to sample, collect and report data for the command. Results were reported to and consolidated by the DISA Security Office.

Analysis: The total number of derivative classification decisions reported for FY16 is 109,332. Of this total, 78,756 were reported by DISA and 30,576 by JFHQ-DODIN. The DISA Security Office attributes the slight increase in decisions to new agency missions received in FY16. JFHQ-DODIN attributes the large increase in derivative classification decisions to FY16 being the first JFHQ-DODIN has been operational for the entire year. In FY15, JFHQ was still in the process of standing up, staffing, training personnel and coordinating/implementing processes to meet mission requirements. The FY16 sampling period also coincided with a JFHQ-DODIN collateral level exercise.

The DISA Security Office included ISOO the chart of examples of how to count decisions in both the paper environment and the electronic environment in the guidance to the activity security managers. In addition, the DISA Security Office hosted a discussion forum to allow activity security managers to share concerns, ask questions and collaborate on best practices.

The DISA Security Office also recognizes a need for improvement in the processing and tracking of Mandatory Declassification Review (MDR) requests and appeals. The DISA Security Office is currently working through the back log with an estimated completion date of February 2017.

The automatic declassification data provided is the agency count as of April 2016. The DISA Security Office was unable to retrieve the final data for FY16 at the time of this report.

PART J: Explanatory Comments

Use this space to elaborate on any section of this form. If more space is needed, provide as an attachment to this form. Provide explanations for any significant changes in trends/numbers from the previous year's report.

Sampling: The sampling period was 08-21 October 2017. The survey for data collection was provided to each activity with the task of ensuring all personnel that carry out derivative classification decisions received the action to collect data during the sampling period. The Joint Forces Headquarters-Department of Defense Information Networks (JFHQ-DODIN) was also tasked to sample, collect and report data for the command. Results were reported to and consolidated by the DISA Security Office.

PART D: Derivative Classification Decisions

DISA CENTRAL Secret derivative classification decisions have increased due to high tempo environment monitoring current operations. Each DISA Central Field Command division has specific ongoing projects/products/Power Point slides that are classified and are updated on a daily basis. Due to the increase in personnel at DISA Central Field command and being embedded with CCMD, they are bound to use USCENTCOM's classification guide on correspondence and documentation which increased Secret classification decisions.

PART E: Mandatory Declassification Review Requests

Two of the three MDRs closed with no agency equities. One MDR was a DVD, decision to declassify in part therefore, page count is not applicable.

PART G: The significant lower number count between last year FY16 for Q.35 and Q.36 and previous years is based on what is required for reporting. There was a decision made by ISOO prior to 2010 for auto-declass reporting, that DISA was made aware of in FY16. The proper reporting brings the agency in line with the other federal agencies. In addition, there was a stop loss on the contract this year, and a loss of one contractor as a result of the stop loss. Lastly, as records are declassified, the inventory is reduced all contributing to the agencies lower count.

PART H: Internal Agency Oversight

These documents were discovered during the 2017 agency Self inspection and pending review.
